

Yacine Rezgui - Web Developer

I'm a full-stack JavaScript engineer, based in London. Organiser of [DevRocket UK meetup](#). Check my [GitHub](#) and my [Twitter](#).

I create scalable front architectures with ReactJS & Flux (or AngularJS) and a complete build system.

I architect web services, interacting with external APIs, connecting to different databases as MySQL, MongoDB, Redis using NodeJS.

I develop from scratch HTML5 mobile app using Cordova/Phonegap or React Native.

Front End Lead at [import.io](#)

Mar 2015 - Now

Create tools consuming our APIs. Prototype new features.

Migrate a static Jenkins build system to a continuous integration using CircleCI.

Experimenting new frameworks, libraries and languages to provide the best toolbox for the developers of my team. Train the team on these new tech stacks.

Web Developer at [import.io](#)

Oct 2014 - Mar 2015

Set common coding principles within the team. Improve existing AngularJS and KnockoutJS apps. Create a tool used by thousands of users with ReactJS.

Web Developer at **GovernorHub**

Jul 2013 - Oct 2014

Working on all engineer areas of the company including the AngularJS browser application, Node.js server and Amazon Web Services infrastructure.

Develop a complete new build system using Gulp including deployment to S3 + CloudFront.

Create from scratch a mobile app (File synchronization, Offline access, Mobile UI/UX) using Cordova & Ionic Framework.

Web Developer at **Tequila Rapido**

Sep 2012 - Jul 2013

Create complex intern management portal and Renault Corporation website using CodeIgniter and jQuery.
